LinkedIn: linkedin.com/matheus-tiburcio

Phone: (15) 99680-5624

Email: matheusgtiburcio@gmail.com

Full Stack developer focused on **web** and **mobile** applications using Next.js, React Native, and TypeScript. On the back-end, I work with Node.js and NestJS, with experience in databases. Currently at **Mind Group**, a software house, I work on projects covering the entire stack. I also have international freelance experience, building interfaces for foreign clients.

EXPERIENCE

Mind Group, Sorocaba – SP

Full Stack Developer

February, 2026 – present

Freelancer, Sorocaba – SP

Frontend Developer

June, 2024 – 2025

Kore (ledger-financial.vercel.app)

- Kore is a **financial management system** built with **Next.js**, **Firebase**, and **Cloud Firestore**. The application simplifies financial control by allowing users to create custom categories with colors, icons, and default values to speed up transaction entries. The standout feature is **automation**: the system uses **serverless cron jobs** to schedule recurring transactions securely, send bill reminders, and dispatch weekly spending and budget summaries directly to the user's email via the **Resend API**.

Daily Diet (github.com/rnDailyDiet)

- Daily Diet is a **mobile app** for **diet tracking and logging**, built with **React Native**, **Expo**, and **TypeScript**. It allows users to add, edit, and delete meals, marking each as on-diet or off-diet, and displays stats such as adherence percentage and best streak. Navigation with **Expo Router** and styling with **NativeWind**.

EDUCATION

UNIP – Universidade Paulista

Bachelor's, Computer Science

2026 – 2030

ETEC – Rubens de Faria e Souza

Technical Degree, Systems Development

2024 – 2025
